

Eating Issues & Body Image

Where
do you fit?

This continuum represents the range of eating behaviors and attitudes towards food and body image. The goal is to function in the "Concerned in a Healthy Way" category, which reflects good physical and emotional health. Throughout life (especially adolescence and early adulthood), many people slip into the "Food Preoccupied" and "Disruptive Eating" categories due to a variety of personal, social, athletic, academic, and/or work-related stresses and pressures. Others stop caring about food and their bodies at all, because of time and cost constraints. No matter where you fit, there are resources to help.
